

This folder contains the do and dta files needed to construct the natural resources shares of output as in MSS.

The following files should be included:

1) build_phiNR.do - main do file used to construct input shares

2) pwt8 - dta dataset available from
<http://www.rug.nl/research/ggdc/data/pwt/pwt-8.0>

Datasets from the WB with input on timber,subsoil,crop and pasture land rents

3) timber_and_subsoil_rent_input.dta

3) crop_land_rent_input.dta

4) pasture_land_rent_input.dta

Output from do file

5) MSS_NRshares.dta.

Place all files in a folder and run build_phiNR.do. user must set directory in build_phiNR.do.

The output of build_phiNR.do is MSS_NRshares.dta.
